

5 reasons to vaccinate your child against **flu**

Protect your child

Flu can make your child seriously ill. Each year, thousands of people end up in hospital with flu.

Protect you, your friends and family

Vaccinating your child will help protect more vulnerable friends and family.

No injection needed

The nasal spray is painless and easy to have.

Effective

In children, the nasal spray works better than the injection. It is given worldwide and has an excellent safety record.

They won't miss school

If your child gets flu, they will probably need to miss school for at least a week, if not longer.
